

ABSTRACT

Margihandayani, Amalia 2022. Developing Interactive Multimedia to Support Teaching Vocabulary

Supervisor 1 : Urai Salam, M.CALL., Ph.D

Supervisor 2 : Wardah, S.Pd., M.Pd

This research was purposed to design appropriate interactive multimedia for the seventh-grade students of SMP Negeri 4 Sintang. The product was developed using Microsoft PowerPoint. Its contents were adapted from the *Buku PR Bahasa Inggris Kelas VII (LKS)* published by *Intan Pariwara*. It was development research by following the ADDIE model. However, the implementation and evaluation phases were excluded due to the time limitation. An English teacher of SMP Negeri 4 Sintang was an informant for this research. A semi-structured interview was used to collect data on the English teacher and students' needs. Moreover, internal validation was to ensure the appropriateness of interactive multimedia. Its contents and design appropriateness are in the range good to excellent category. The results showed that interactive multimedia is applicable.
