

## ABSTRAK

Krismon: Peran Orang Tua Dalam Mencegah Anak Putus Sekolah Di Desa Bani Amas Kecamatan Bengkayang Kabupaten Bengkayang Skripsi Program Studi Pembangunan Sosial Fakultas Ilmu Sosial Dan Ilmu Politik Universitas Tanjungpura 2022.

Penelitian ini bertujuan untuk mendeskripsikan dan menganalisis Peran Orang Tua Dalam Mencegah Anak Putus Sekolah Di Desa Bani Amas Kecamatan Bengkayang Kabupaten Bengkayang. Dimana masih terdapat beberapa anak mengalami putus sekolah di Desa Bani Amas Kecamatan Bengkayang Kabupaten Bengkayang. Penelitian ini menggunakan metode deskriptif kualitatif. Dalam penelitian ini subjek dipilih dengan menggunakan Teknik Purposive. Berdasarkan hasil penelitian dengan menggunakan teori Abu Ahmadi (2001:4), Menunjukkan secara umum Peran Orang Tua Dalam Mencegah Anak Putus Sekolah Di Desa Bani Amas Kecamatan Bengkayang Kabupaten Bengkayang belum dapat dikatakan berhasil. Hal ini di lihat dari indikator: 1) Pelaksanaan peran pendidik belum terlalu maksimal karena kurangnya pemahaman tentang peran orang tua terhadap Pendidikan. 2) Pendorong, kurangnya dorongan belajar dari orang tua mengakibatkan anak mengalami putus sekolah dimana peran orang tua sangat penting dalam pembelajaran anak disekolah maupun diluar sekolah. 3) Panutan, dimana peran orang tua sudah memberikan arahan yang baik terhadap anak yang mengalami putus sekolah, tetapi anak yang mengalami putus sekolah dikarekan kemauannya sendiri tidak ada paksaan dari orang disekitarnya. 4) Fasilitator, dalam proses pelengkapan pembelajaran sudah cukup baik, setiap anak yang sekolah memiliki perlengkapan yang sudah diberikan orang tua kepada mereka, sedangkan disekolah sudah di katakan mencukupi mengenai fasilitas belajar di sekolah. Namun hal ini masih saja ada anak yang mengalami putus sekolah sehingga membuat orang tua menjadi tidak peduli lagi dalam memenuhi setiap perlengkapan Pendidikan anaknya. Saran yang penulis rekomendasikan adalah harus dilakukan pengawasan terhadap anak yang mengalami putus sekolah oleh orang tua maupun guru dalam Pendidikan anak, sehingga informasi yang diberikan bisa dipahami dengan baik sesuai dengan tujuan Mencegah Anak Putus Sekolah.

Kata kunci: Peran, Orang tua, Anak, putus Sekolah.

## ABSTRACT

Krismon: The Role of Parents in Preventing Children from Dropping out of School in Bani Amas Village, Bengkayang Sub-District, Bengkayang Regency. Undergraduate Thesis of Social Development Study Program, Faculty of Social and Political Sciences, Tanjungpura University 2022.

This study aims to describe and analyze the role of parents in preventing children from dropping out of school in Bani Amas Village, Bengkayang Sub-District, Bengkayang Regency, where there are still some children who dropped out of school in Bani Amas Village, Bengkayang Sub-District, Bengkayang Regency. This study used a qualitative descriptive method. In this study, the subjects were selected using the Purposive Technique. Based on the results of research using the theory of Abu Ahmadi (2001:4), it shows that in general the role of parents in preventing children from dropping out of school in Bani Amas Village, Bengkayang Sub-District, Bengkayang Regency cannot be regarded as being successful. This can be seen from the following indicators: 1) The implementation of the role of educators has not been optimized due to a lack of understanding of the role of parents in education. 2) Encouragement, lack of encouragement to learn from parents that causes children to drop out of school where the role of parents is very important in children's learning at school and outside school. 3) Role model, where the role of parents should provide proper guidance to children who dropped out of school, but children who dropped out of school are because of their own will and there is no coercion from the people around them. 4) The facilitator, the process of providing learning facilities is quite good where every child who goes to school has facilities that has been provided for them by parents, while at school it is regarded as being sufficient in terms of learning facilities. However, there are children who drop out of school so that parents do not care anymore in providing their children's with educational facilities. The recommendations from this research is that parents and teachers should supervise children who drop out of school especially regarding children's education, so that the information provided can be understood properly in accordance with the goal of preventing them from dropping out of school.

**Keywords:** Role, Parents, Children, dropping out of school.
